# Great news, Ultrafast Fibre broadband is now available to order

By pledging your UK Gigabit Voucher from the government towards your community scheme you committed to order Ultrafast Full Fibre broadband as soon as it was available. It's time to decide which provider you'll order from as an upgrade is not automatic.

Soon you'll be enjoying the benefits of the fastest, most reliable broadband on the market. Streaming multiple devices at the same time with no buffering or drop outs. It'll service your connectivity needs for years to come.

Once your new broadband service is live, you'll receive an email from the Building Digital UK (BDUK), the executive agency within the UK government which manages the GBVS. Follow the link in that email to confirm your new Ultrafast Full Fibre broadband service is up and running. This will complete your voucher obligations and release the value of your voucher. Emails will come from [funding.platform@notifications.service.gov.uk](mailto:funding.platform@notifications.service.gov.uk)

## Ready to order?

1. Speak to your existing provider about ordering or upgrading to Ultrafast Full Fibre broadband
2. If they don't sell in your area, check out [www.openreach.com/getfibre](http://www.openreach.com/getfibre) for a list of potential providers
3. Place your order as soon as possible
4. Respond to the the UK government email confirming  
your Ultrafast Full Fibre broadband is live
